Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 9, 22, and 23 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 9 recites filling material comprises spin-on organic oxide, which is unrelated to I-line photoresist of claim 1, therefore, claim 9 fails to further limit the subject matter of claim 1.

Claim 22 recites filling material comprises I-line PR, which is same as I-line photoresist of claim 14, therefore, claim 22 fails to further limit the subject matter of claim 14.

Claim 23 recites filling material is spin-on organic oxide, which is unrelated to I-line photoresist of claim 14, therefore, claim 23 fails to further limit the subject matter of claim 14.

Claim Rejections - 35 USC § 112

2. Claim 9 is ejected under 35 U.S.C. 112, first paragraph, as containing subject matter, which was not described in the specification.

Art Unit: 1765

Claim 9 inherits the limitation of I-line photoresist of claim 1 and also comprises spin-on organic oxide. It is a new matter because it was not described in the specification.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 recites filling material is spin-on organic oxide, however, the base claim 14 recites the filling material comprising I-line photoresist, therefore it is inconsistent and vague and indefinite.

Allowable Subject Matter

5. The following is a statement of reasons for the indication of allowable subject matter:

The references of record do not teach or suggest a method of eliminating volcano effect in dual damascene comprising: after forming a hole opening through the first and second insulative layers, forming a fill material over the substrate including in the hole opening, wherein the filling material comprises I-line photoresist; removing the excess I-line photoresist (filling material) by chemical mechanical polishing.
